ELSEVIER Journal of Virological Methods 53 (1995) 274–276

Journal of Virological Methods

Contents Volume 53

No. 1

Research Papers

S.A. Fox, R.R. Lareu and N.R. Swanson (Australia)
Rapid genotyping of hepatitis C virus isolates by dideoxy fingerprinting 1
C. Eklund and J. Dillner (Sweden)
A two-site enzyme immunoassay for quantitation of human papillomavirus type 16 particles 11
I. Casas, L. Powell, P.E. Klapper and G.M. Cleator (UK)
New method for the extraction of viral RNA and DNA from cerebrospinal fluid for use in the polymerase chain reaction assay 25
H.J. Botma, H. Dekker, P. Van Amstel, I. Cairo and F.M. Van den Berg (Netherlands)
Differential in situ hybridization for herpes simplex virus typing in routine skin biopsies 37
S. Zientara, C. Sailleau, S. Moulay, A. Wade-Evans and C. Cruciere (France, UK)
Application of the polymerase chain reaction to the detection of African horse sickness viruses 47
W.P. Campbell and C. Huang (USA)
Detection of California serogroup viruses using universal primers and reverse transcription–polymerase chain reaction 55
S.-L. Yu, N. Wang, C.-Y. Liou and W.-J. Syu (Taiwan, ROC)
Assay of HIV-1 protease activity by use of crude preparations of enzyme and biotinylated substrate 63
S.R. Kelsall and J.K. Kulski (Australia)
Expression of the major capsid protein of human papillomavirus type 16 in *Escherichia coli* 75
H.A. Cubie, J. Grzybowski, C. Da Silva, L. Duncan, T. Brown and N.M. Smith (Scotland)
Synthetic oligonucleotide cocktails as probes for detection of human parvovirus B19 91
G.R. Vinogradskaya, I.Yu. Goryshin, Yu.A. Berlin and V.A. Lanzov (Russia)
Optimization of PCR-based diagnostics for human cytomegalovirus 103
G. Berg and H. Sanjaghsaz (USA)
KCl potentiated inactivation of poliovirus 1 by free chlorine at pH 4.5 113
P. Tilston and G. Corbitt (UK)
A single tube nested PCR for the detection of hepatitis C virus RNA 121
C.-H. Chen, J.-T. Wang, C.-Z. Lee, J.-C. Sheu, T.-H. Wang and D.-S. Chen (Taiwan)
Quantitative detection of hepatitis B virus DNA in human sera by branched-DNA signal amplification 131
S. Goldstein, B. Hague, D. Montefiori and V.M. Hirsch (USA)
A macaque adherent cell line that expresses human CD4 is susceptible to SIV: utility for assessing neutralizing antibody 139
T. Hanke, D.F. Young, C. Doyle, I. Jones and R.E. Randall (UK)
Attachment of an oligopeptide epitope to the C-terminus of recombinant SIV gp160 facilitates the construction of SMAA complexes while preserving CD4 binding 149
P. Torrigiani, A.L. Rabiti, L. Betti, F. Marani, M. Brizzi, N. Bagni and A. Canova (Italy)
Improved method for polyamine determination in TMV, a rod-shaped virus 157

Corrigenda

G. Boivin, C.A. Olson, M.R. Quirk, S.M. St-Cyr and M.C. Jordan (USA)
Corrigendum to 'Quantitation of human cytomegalovirus glycoprotein H gene in cells using competitive PCR and a rapid fluorescence-based detection system' (J. Virol. Methods 51 (1995) 329–342) 165
A. Van Belkum, E. Linkels, T. Jelsma, H.J. Houthoff, F. Van den Berg and W. Quint (The Netherlands)
Corrigendum to 'Application of a new, universal DNA labeling system in the PCR mediated diagnoses of *Chlamydia trachomatis* and human papillomavirus type 16 infection in cervical smears' (J. Virol. Methods 45 (1993) 189–200) 166

No. 2

Research Papers

C. Payan, F. Bloch, I. Gaultier and L. Bélec (France)
Single-step reverse transcription-polymerase chain reaction for hepatitis C virus RNA with DNA enzyme immunoassay hybridization 167
D.L. Krah, P.J. Provost and R.W. Ellis (USA)
Combined use of complement and anti-immunoglobulin in an enhanced neutralization assay for antibodies to varicella-zoster virus 176
O. Marquardt and V.F. Ohlinger (Germany)
Differential diagnosis and genetic analysis of the antigenically related swine vesicular disease virus and Coxsackie viruses 188
K.M. Tham, L.W. Young and C.D. Moon (New Zealand)
Detection of infectious bursal disease virus by reverse transcription-polymerase chain reaction amplification of the virus segment A gene 201
J.R. Kerr, M.D. Curran, J.E. Moore, D.D. Erdman, P.V. Coyle, T. Nunoue, D. Middleton and W.P. Ferguson (Northern Ireland, UK, USA, Japan)
Genetic diversity in the non-structural gene of parvovirus B19 detected by single-stranded conformational polymorphism assay (SSCP) and partial nucleotide sequencing 213
L.M. McElhinney, R.J. Cooper and D.J. Morris (UK)
Multiplex polymerase chain reaction for human herpesvirus-6, human cytomegalovirus, and human β-globin DNA 223
K. Sano, F. Odawara, T. Nakano, S. Morimatsu, T. Nakamura, Y. Saitoh, Y. Jiang, H. Misaki, Y. Sakai and M. Nakai (Japan)
Comparable sensitivities for detection of HIV-1 reverse transcriptase (RT) and other polymerases by RT assays requiring no radioisotopic materials 235
P.L. Rady, I. Arany, T.K. Hughes and S.K. Tyring (USA)
Type-specific primer-mediated direct sequencing of consensus primer-generated PCR amplicons of human papilloma viruses: a new approach for the simultaneous detection of multiple viral type infections 245

Short Communications

O. Marquardt, O.C. Straub, R. Ahl and B. Haas (Germany)
Detection of foot-and-mouth disease virus in nasal swabs of asymptomatic cattle by RT-PCR within 24 hours 255
V.K. Ward, S.B. Kreissig, B.D. Hammock and P.V. Choudary (USA)
Generation of an expression library in the baculovirus expression vector system 263

Erratum

V.M. Carn, R.P. Kitching, J.M. Hammond, P. Chand, J. Anderson and D.N. Black (UK)
Erratum to 'Use of a recombinant antigen in an indirect ELISA for detecting bovine antibody to capripoxvirus'. J. Virol. Methods 49 (1994) 285–294 273
